GN-MEBA - Groupement National de Microscopie
Électronique à Balayage et de microAnalyses

SCOPE OF THE WORKSHOP

The primary aim of this series of Workshops is to assess the state of the art and reliability of microbeam analysis techniques.

The Workshops are organised in such a way as to maximise transfer of knowledge among the participants and to provide a comprehensive exhibition of the latest analytical equipment. The programme allows for adequate time and opportunities for participants to visit the technical exhibitions and hold discussions with the manufacturers.

SCIENTIFIC PROGRAMME

The programme will consist of invited plenary lectures, poster presentations and round-table discussions on topics of the invited lectures, led by experts in the field.

The main topics to be dealt with during this workshop will be:

- *Pushing the limits of EPMA: low-voltage EPMA, state of the art of detectors (SDD / WDS / EDS), trace analysis, ...*
- *Microanalysis in the SEM: EBSD, FIB (3D) EDS, variable-pressure SEM, contrast mechanisms, ...*
- *New techniques, developments, and concepts: nuclear microprobe (NRA), laser induced breakdown spectroscopy (LIBS), μ -Raman, TEM precession, ...*
- *Microbeam analysis of nuclear materials, light elements of glass, photovoltaics, mineral surface / organic matter interaction, ...*
- *Applications to catalysts, composites, glass, sensors, and in cultural heritage, environment, forensics, geology, mineralogy, metallurgy, microelectronics, surfaces and interfaces, etc.*

POSTER PRESENTATION
